practice_xlsxwriter.py

practice_xlsxwriter.py

```
 1   import xlsxwriter
 2
 3   workbook = xlsxwriter.Workbook('hello.xlsx')
 4   worksheet = workbook.add_worksheet()
 5
 6   for value in range(1, 51):
 7       worksheet.write('A'+str(value), 'A'+str(value))
 8       worksheet.write('B'+str(value), 'B'+str(value))
 9       worksheet.write('C'+str(value), 'C'+str(value))
10       worksheet.write('D'+str(value), 'D'+str(value))
11
12   workbook.close()
```
